

CLEAN PAC

The ideal cleaner

for heat pump maintenance

- Optimize the output of your heat pump
- Gets to the bottom of dust and grease
- Effective in minutes
- Flexible bottle with spray nozzle
- Rinse-free, acid-free use

Effective on mechanical and food grease, tar, pollution particles, dust and other dirt.
Compatible with most surfaces

CLEANPAC, the extra-powerful cleaner from Poolex, has been tested to make your life easier.

Over time, the evaporator of your heat pump can become clogged. Dust, plant and organic matter can obstruct it, reducing its performance, and even causing it to fail.

CLEANPAC from POOLEX comes with a bottle incorporating an adjustable spray nozzle as well as a flexible body to access the most inaccessible parts of the evaporator.

Its combination of degreasing agents provides perfect efficiency right from first use, even for the dirtiest of evaporators, without affecting your heat pump.

For optimum use in full safety, follow the instructions on the bottle.

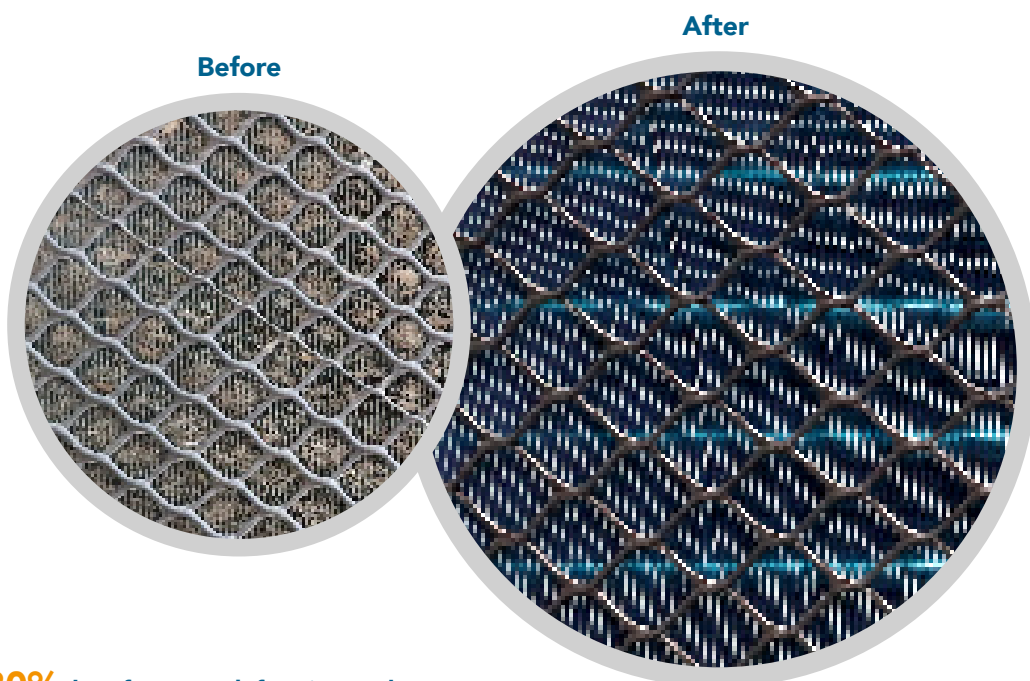

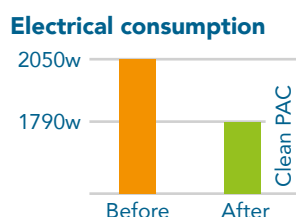

The POOLEX :

Example of a heat pump, before / after cleaning with Poolex Clean Pac

Jetline premium 90

Year of production: 2016

Used 8 months per year

30% less frequent defrosting cycles
